**Subject:** RE: PP Tree Clearing Plan

John,

I discussed this with Dominion and we agree that equipment can be used within Ponds E and D. Any cutting outside of the pond should be done with chainsaws and no cutting should occur in the area of wetland concern unless the Glover verifies that there is ash within the area where the trees will be cut.

Thanks,

John Klamut

**Subject:** Re: PP Tree Clearing Plan

John,

For the clear treeing will the trees inside of pond D need to be cut with a chain saw or can equipment be used with minimal disturbance?

Thanks

John Glover

John,

See the attached figure showing the Pond E Dredging tree clearing areas. The trees should be cleared prior to May 4, 2015. The purpose is to fell trees which may need to be cut for the Pond E Dredging, Placement of Ash in Pond D, and installation of a temporary treatment system for dewatering.

The area that is called out as "Contractor to Verify Trees are located within the Limits of Ash" is associated with a **potential** wetland area based on our draft wetland mapping, so we need to verify there is ash where the trees will be cut. Please let me know if you have any questions.

Based on the aerial, most of the areas called out don't actually have trees in them, so hopefully this won't involve too much cutting. If there are any other areas which need tree cutting in order to perform the dredging or clean closure of Pond E please let me know.

Thanks,

John Klamut

**Subject:** PP Tree Clearing Plan

John,

Attached is a pdf of the Tree Clearing Plan for Possum Point.

Thanks
